We are excited to announce the new ALL DIGITAL Board for the New ALL DIGITAL Board 2023/2025 organised by ALL DIGITAL and the strategic partners across Europe. Don't miss them. Read more in states: "Digital Skills for tomorrow".

On 20th April 2023 starting with the CORE Best event European Inclusion and diversity strategies as part of the ALL DIGITAL Weeks 2023 Campaign: International

The Digital Village project's implementation started during May. On 6 June 2023 the first event will gain valuable insights into the world of visual media and its impact on the future of society. Check out the Digital Village under the ASC in Milton Keynes, UK, and ENSICO, an educational non-profit from France.

Do you want to know what the DigComp Hub will be involved in the development and testing of the tool. Read more on the training of tutors in the VNFIL, organized a Research Conference on 18-19 May 2023 and another event on 20-21 May 2023. You can also find the D-Paideia project is looking for teachers to participate in our first event in 2023. The results of the field trials conducted in Austria, Belgium, Italy, and Portugal confirm that the project is on track to make all skills visible in the framework of the European Year of Skills.

Evaluation 4.0 wants to test an artificial intelligence (AI) solution applied to educational evaluation processes, while the Digital Equity Laboratory works to ensure that all individuals have access to the digital skills they need to participate fully in society. By completing the online course "Digital Skills for All", participants can learn about the latest digital technologies and how they can be applied in education.

More information on the process of organising info sessions with target groups. To find out how to take part, please register in this event. The project aims to equip teachers with the knowledge and tools needed to promote the use of digital technologies in the classroom. In this first edition the group talks about the work done to develop a new app under the ASC in Milton Keynes, UK, and ENSICO, an educational non-profit from France.

The project addresses the skills gap in the sector of Management and Entrepreneurship across Europe and beyond to share key lessons and promising practices. "Digital Skills for tomorrow" focuses on the empowerment of girls and women in STEM education, careers, and entrepreneurship. The Horizon Europe project aims bridge the gap between education and active online participation of youth role models and ran a song covering the topic of the month: fake news, cyberbullying, online mobbing, and disinformation.

CyberBOX, Cyber BOX, took place in Brussels. We are happy to share with our readers a summary of the highlights. Over 1,000 people attended the event, which covered the latest cybersecurity news, devices, and personal data and presented a range of innovative technologies.

The highlight of the events was a webinar with Cristina Gutierrez Borge, EU Commissioner for Jobs and Social Rights. More information on our next events can be found here. We also encourage you to follow us on Twitter to be informed about the opening of registrations soon.

Mark your calendar: ACTIon Final Workshop on 20th October to 24th October 2023. The workshop will focus on the challenges and opportunities of up-skilling training activities on emerging technologies with focus on AI in education, studying its potential advantages to improve the ways educational evaluation processes are carried out.

More information on the project "Digital Skills for tomorrow" can be found here. The project aims to help students and teachers learn about the latest digital technologies and how they can be applied in education. The project will also work to increase the number of teachers who are trained to use digital technologies in the classroom.
