DIGITAL
WELCOME

Are you an asylum seeker or a refugee and aged between 16 and 30?

Do you want to explore some creative usage of a computer?

Do you want to work as a volunteer and help other people learn how to use new technologies?

Come and join the Digital Welcome programme

Is the digital welcome programme for you?

The Digital Welcome programme is a program for young refugees or asylum seekers who want to improve their language skills and computer skills. You will follow a course of 60 hours in which you learn how to organise workshops on computer skills.

When you finish the course, you choose a group of people you want to work with as a volunteer.

Do you want to teach older people how to use a smartphone or a computer?

Do you want to teach digital photography to children?

Do you dream of giving a coding workshop to other youngsters?

In Digital Welcome, you will be able to do all this, and more. We will help you define who you want to teach and how many hours of volunteer work you want to do.

Finally, you will make a digital story about your volunteer work. So, you can show the world what you can do.

Are you working with refugees and asylum seekers?

If you are an organisation or public institution working for the integration of refugees and asylum seekers, our methodology may be very useful for you.

We will develop and test it in April – July 2018. Then we will update it and share our experience with you. We want your help along the process.

In October 2018, we will organise an event to present the methodology to you. If you want to get invited, contact us now.

DIGITAL WELCOME

The digital welcome program will go on in Barcelona, Athens, Berlin, Brussels, Rome and Umbria Region in 2018 and 2019.

Contact the organisation in your city to get more info and apply!
Don't forget to put Digital Welcome in the subject of your e-mail!
