Co-funded by
the European Union

The pilot trainings have begun for Green at You partners. In May's newsletter, you can get a glimpse of how the training is going in each itinerary.

The **Green at You** project launched the first edition of its **training itineraries in green employment and entrepreneurship in Spain**, reaffirming its commitment to providing high-quality and accessible education in the sector. The initiation event for the training programs took place on January 31 at the Higher Technical School of Forestry, Environmental and Rural Engineering of the Polytechnic University of Madrid (UPM).

During the event, students, teachers, and guests had the opportunity to experience an initial in-person introduction to the itineraries through a dialogue about the project, discussing its objectives, challenges, and potential, as well as an overview of what their daily experience will be like in the coming months.

POLITÉCNICA

"An excellent start to our **Nature-Based Solutions course!** We're excited to explore how nature can solve urban and environmental challenges. Our students are already immersed in practical sessions and enriching discussions. Onward to a more sustainable future!"

POLITÉCNICA

"We've kicked off our **Sustainable Forest Management** course with great enthusiasm. From management techniques to biodiversity conservation, every session has been an opportunity to learn and share experiences. Proud to contribute to the care of our forests and communities!"

Together with our trainer Leire Díez , we have delved into key issues such as the functioning of energy markets and the problem of #energypoverty, providing them with the necessary tools to face the challenges of the sector.

The Educational Farm operator course has been a valuable opportunity to explore the connection between sustainable agriculture and gastronomy.

Participants of the second edition of the Nature-Based Solution Operator course, which started on March 4th, are actively engaging in hands-on learning experiences. This training provides valuable insights into sustainable environmental practices and innovative nature-based solutions.

The online training has been ongoing for both CER and Forestry Management courses!

The Educational Farm Operator course has started in Greece with physical workshops in organic gardens, as well as marketing actions in the headquarters.
